

FANTASY LIGHT SWITCH LEAGUE

LIKE FANTASY FOOTBALL, BUT FOR LIGHT SWITCHES. IT'S LIGHT SWITCH SEASON!

RECOMMENDED FOR: 2-6 PLAYERS

SETUP:

The group of players compiles a list of different styles of light switches. Assign a point amount to each switch, assigning higher point values to rarer switches.

Draft out at least 2 switch types to each player. If you have less than 6 people playing, then draft out all the switches evenly.

Check out page 2 for example switches.

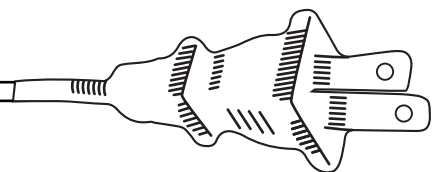

Make sure to tailor your list to the places your group goes to. Visit dives all the time? Think of the oldest, crappiest light switch styles and add those.

GAMEPLAY:

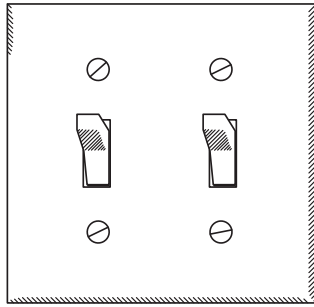

Your group should determine what locations are acceptable to find light switches (e.g.: Bars or friends' houses, but not your own home.) As you visit these places, scope out the light switch situation, and document it with a photo and record the location in a group document.

Switches can span multiple types - for example, you may find a multi-switch that is colored - but you only get the points for your draft.

The length of light switch season is determined by your group. The person with the most points at the end of the season is the winner.
